

November 2024, London

<https://httpworkshop.org>

Welcome to the sixth
HTTP Workshop.

- **HTTP Community** - implementers, specifiers, practitioners, researchers
- **Open Discussion** - invited talks to start conversations, not provide one-way information
- **Unique Opportunity** - people who otherwise might not interact
- **NOT** a decision-making body.

Outcomes

- Better communication and community building
- Insight into what's happening in standards, implementations, and deployments
- Feedback to the standards process

How it Works

- We've invited a few lightning talks to start some conversations
- Other topics can and will come up
- We depend upon your participation to make this valuable.

Code of Conduct

The HTTP Workshop is dedicated to providing a harassment-free experience for all attendees, regardless of gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, religion, or ethnicity.

We do not tolerate harassment in any form, and reserve the right to determine what qualifies as harassment.

Sexual language and imagery is not appropriate in Workshop talks or discussions, or in related events or online fora.

Attendees violating these rules may be expelled from the Workshop at the discretion of the program committee. If you experience or witness a violation, please contact any member of the program committee.

We ask that attendees assume good faith in all discussions, and that while ideas should be held to close scrutiny, they should be clearly separated from the people advocating for them.
